

Classroom GAMES

These simple games are no-prep and can be used with worksheets in any subject!

Roll Your Score

Students work with a partner in this game.

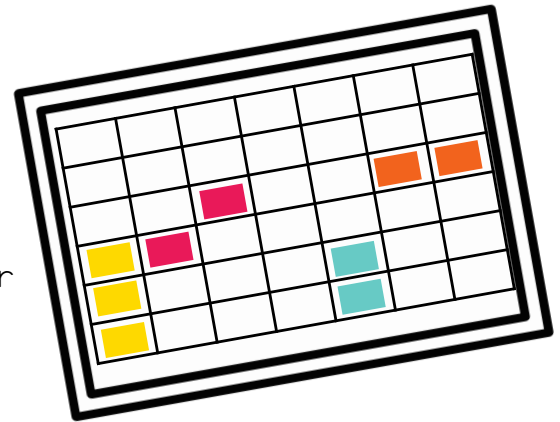

- When a student completes the question, their partner checks their work.
- If it is accurate, the student rolls two dice and adds them together.
- The number represents the points that the student earns for that problem.
- Now it is their partner's turn to work on the next question.
- Students will go back and forth until all of the questions are answered.
- Then, they add up their points to see who scored the highest.

Connect Four

This is a great game to play with table groups.

- Assign each group a color of sticky notes.
- Draw a 7X6 grid on your white board.
- Groups must work together to solve a problem on their worksheet.
- If their answer is accurate, they can put one of their team's sticky notes on the grid.
- The first team to get four of their sticky notes in a row on the grid is the winning team.

Random Numbers

Students can work independently for this game.

- Display a hundreds chart on your white board.
- Students will work to complete questions on their worksheet.
- Once they have completed one (or more if you want), they come to you to have their answer checked.
- If it is accurate, they can write their name in one box on the hundreds chart.
- When you run out of time, use a random number generator app to pick a few numbers.
- If a student's name is on that number, they earn a prize or reward.

Numbers 1 - 100										
0	1	2	3	4	5	6	7	8	9	10
10	11	12	13	14	15	16	17	18	19	20
20	21	22	23	24	25	26	27	28	29	30
30	31	32	33	34	35	36	37	38	39	40
40	41	42	43	44	45	46	47	48	49	50
50	51	52	53	54	55	56	57	58	59	60
60	61	62	63	64	65	66	67	68	69	70
70	71	72	73	74	75	76	77	78	79	80
80	81	82	83	84	85	86	87	88	89	90
90	91	92	93	94	95	96	97	98	99	100
