UNIT 3: ADDITION & SUBTRACTION *at a glance*

Day 1 Pretest & Expanded Form	Day 2 Number Line Addition	Day 3 Number Line Addition	Day 4 Addition with the Standard Algorithm	Day 5 Addition with the Standard Algorithm
Day 6 Addition with the Standard Algorithm Word Problems	Day 7 Commutative Property	Day 8 Associative Property	Day 9 Associative Property	Day 10 Review Day
Day 11 Subtraction with a Number Line	Day 12 Subtraction with a Number Line	Day 13 Subtraction with Models	Day 14 Subtraction with Models	Day 15 Subtraction with the Standard Algorithm
Day 16 Subtraction with the Standard Algorithm	Day 17 Subtracting Across Zeros	Day 18 Subtracting Across Zeros	Day 19 Word Problems	Day 20 Review Day
Day 21 Relationship Between Addition and Subtraction	Day 22 Patterns	Day 23 Word Problems	Day 24 PBL	Day 25 Assessment

THIS UNIT COVERS THE FOLLOWING COMMON CORE MATH STANDARDS: 3.NBT.2, 3.OA.8, and 3.OA.9

includes a pacing guide to see
each unit at a glance

3.17 SUBTRACTION ACROSS ZEROS

I CAN STATEMENT
I can solve subtraction problems across zeros.

MATERIALS
3.17 PowerPoint
3.17 printouts
THTO mats (intervention)

VOCABULARY
hundreds

3.17 SUBTRACTION ACROSS ZEROS

I CAN STATEMENT
I can solve subtraction problems across zeros.

MATERIALS
3.17 PowerPoint
3.17 printouts
THTO mats (intervention)

VOCABULARY
hundreds
tens
ones
subtraction

3.2 NUMBER LINE ADDITION

I CAN STATEMENT
I can add numbers using a number line.

MATERIALS
3. PowerPoint
3.2 printouts
THTO mats (intervention)

VOCABULARY
expanded form
standard form
place value
addition
hundreds
tens
ones
sum

MINI LESSON

Using the PPT, guide students through the warm-up questions.

Review the math vocabulary term "addition". Using the PPT, introduce the vocabulary word "addend" to students.

Model how to add 134 and 241 using the PPT. Walk students through each step, verbally guiding them while solving the equation.

Introduce students to the vocabulary word "sum". Use the the word "sum" to refer to it each time you model an addition problem in the PowerPoint to the students that when they see the word "sum", they should know they are solving an addition problem.

Continue modeling addition with number lines with the PPT. Stop as you teach, and allow time for student questions.

INTERVENTION
Give students the THTO mats to organize their numbers into thousands, hundreds, tens, and ones.

EXTENSION
Ask students to model the number line and write the sum.

WRAP UP

Allow students time to complete the exit ticket. After everyone is finished, grade the exit ticket together, and allow time for student feedback.

3.5 STANDARD ALGORITHM

I CAN STATEMENT
I can add numbers using the standard algorithm.

MATERIALS
3.5 PowerPoint
3.5 printouts
THTO mats (intervention)

VOCABULARY
addition
hundreds
tens
ones
sum
standard algorithm

MINI LESSON

Using the PPT, guide students through the warm-up questions.

This lesson is similar to Lesson 3.4. However, students will be introduced to addition with regrouping, while you are modeling how to regroup, make sure to refer to the appropriate place values.

For example, the first problem has students regroup in the ones place by adding 8 and 3. Refer to the sum, as eleven ones. Ask students if eleven ones is too many to write in the ones place. Ask students how many tens are in eleven ones. Write the ten in the tens place.

Repeat the strategy when regrouping the tens place. Later in the lesson, you will model adding four tens and six tens. Refer to the answer as ten tens. Ask students if ten tens is too many to write in the tens place or if you can put any in the hundreds place.

INTERVENTION
Give students the THTO mats to organize their numbers into thousands, hundreds, tens, and ones. Use these mats to align correctly, not expand the numbers.

EXTENSION
Ask students to transform why it is important to add from right to left from the ones place to the hundreds place. Ask if they could regroup correctly if they started with the hundreds place.

WRAP UP

Allow students time to complete the exit ticket. After everyone is finished, grade the exit ticket together, and allow time for student feedback.

INCLUDES DAILY WHOLE GROUP LESSON PLANS WITH EVERY UNIT!

25 MEET THE TEACHER

MATERIALS FOR TEACHER: whiteboard, eraser, marker, laminated 100 or paper hundreds chart in sleeve protectors (at least one per student in the group).

MATERIALS FOR STUDENTS: whiteboard, eraser, marker

APPROACHING
Circle the number 53 on the hundred chart. Count the spaces with the group to determine if number 53 would round to. Repeat using the students.

50	51	52	53	54	55	56
----	----	----	----	----	----	----

-If this group is larger, print multiple rounds.

ON TRACK
Circle 60. Have students determine all the numbers that would round to 60. Repeat with numbers 20, 40, or 80. Start by using the rounder, then work off it.

50	51	52	53	54	55
60	61	62	63	64	65

MASTERS
Give students the number for a number that would round to that ten. If they would not round to that ten, have them reason to the group. If reasoning is 60, 80 and 120. Possible numbers: 130.

NOTES:

NOT SO WIMPY TEACHER

IF students are doing well, ask them to find the tens and the midpoint and then the hundreds and the midpoint for each number you give them. Have students share the different strategies for the tens and finding the hundreds when given numbers.

26 MEET THE TEACHER

MATERIALS FOR TEACHER: whiteboard, eraser, marker

MATERIALS FOR STUDENTS: whiteboards, erasers, markers

APPROACHING
Have students skip count by 100. Explain that in this exercise we will use hundreds to start and end our number lines.
Model using the number 452. Ask students what number is in the hundreds place. Explain that this will be the bottom hundred on the number line. Have students count to the next hundred to find the top hundred on the number line.
Continue practicing using numbers: 627, 778, and 804.

ON TRACK
Model how to draw the midpoint number line for students. Write the number 452 on your whiteboard. Review how to find the hundreds. Ask students to help you find the midpoint.
Ask students to find the hundreds for 769. Have them find the midpoint.
Continue practice using the following numbers: 348, 589, and 722.

MASTERS
Ask students to find the hundreds and the midpoint for 452. If students can do this with little issues, have them continue with the following numbers: 512, 603, and 899.

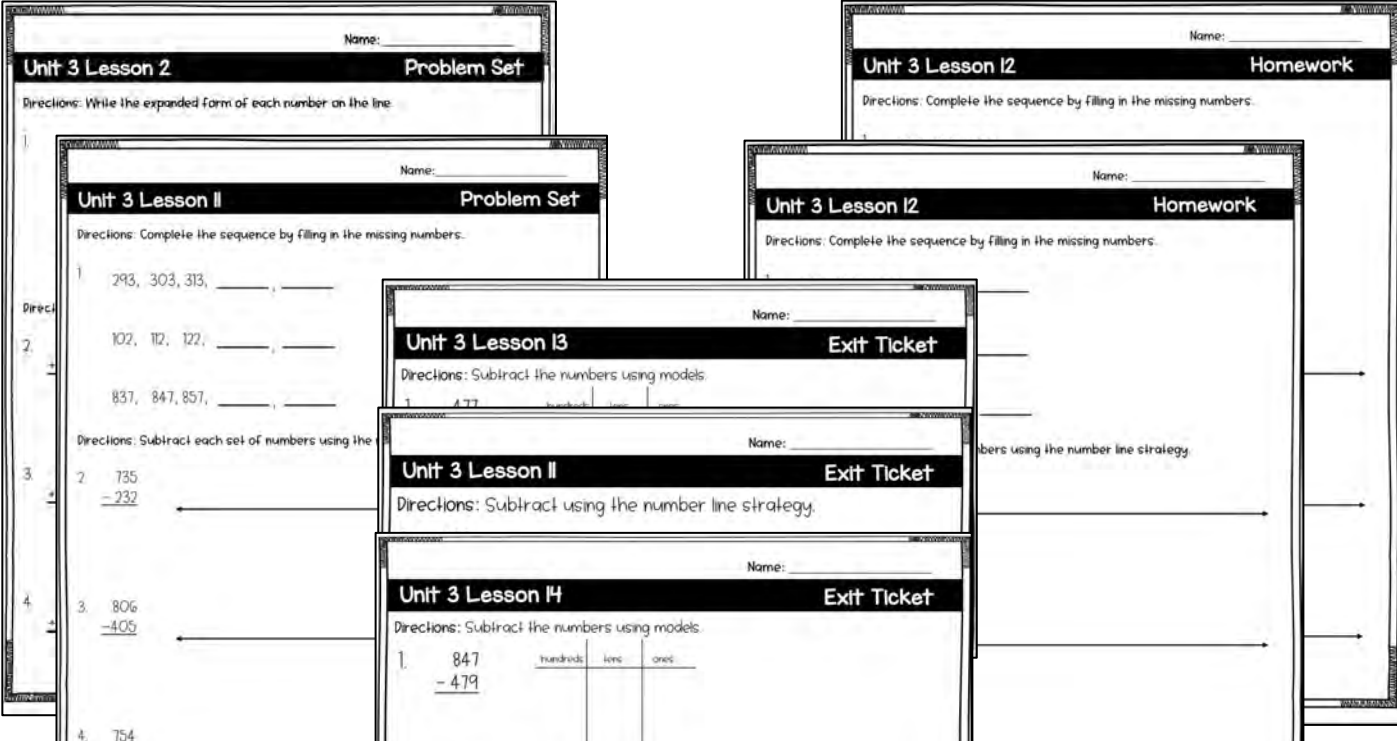

NOTES:

NOT SO WIMPY TEACHER

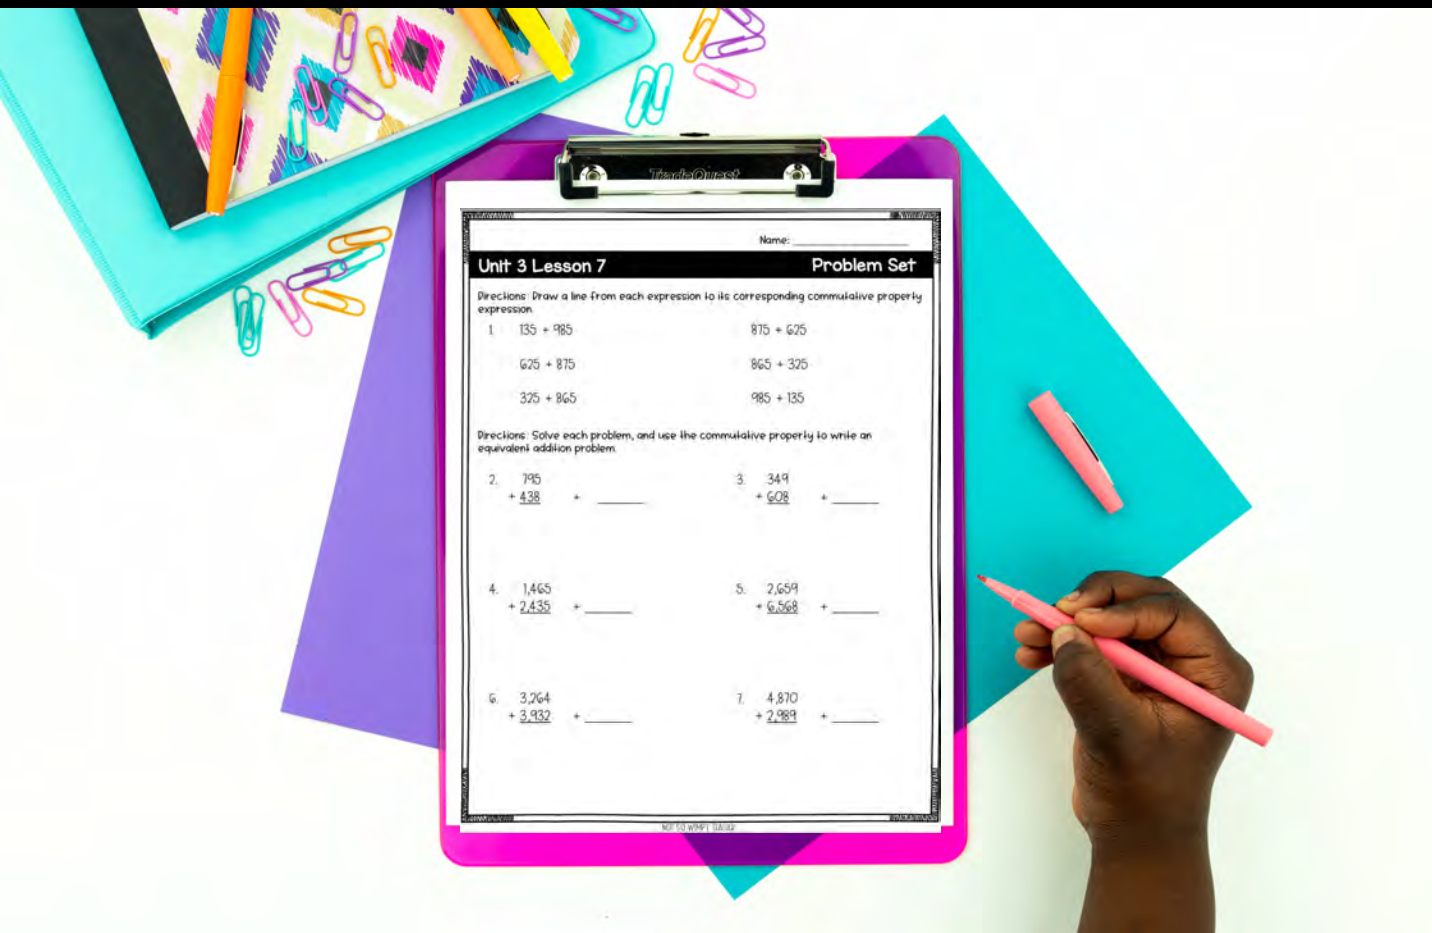

IF students are doing well, ask them to find the tens and the midpoint and then the hundreds and the midpoint for each number you give them. Have students share the different strategies for the tens and finding the hundreds when given numbers.

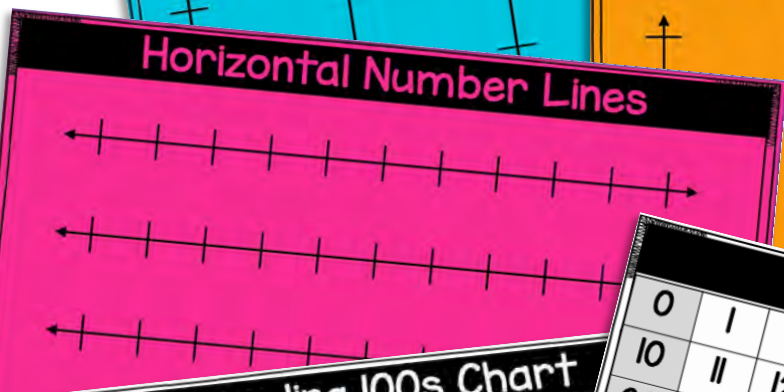

INCLUDES DAILY SMALL GROUP/ MEET WITH TEACHER LESSON PLANS

INCLUDES PROBLEM SETS, HOMEWORK, AND EXIT TICKETS FOR EACH DAY

FUN AND ENGAGING END OF THE UNIT PROJECT BASED LEARNING REVIEW ACTIVITIES INCLUDED

LET'S GO

What a game! The Springfield Stingrays won at the stadium, it's...

Bus Color
Red

ends

heads

TEAM:

HALFTIME GAME

Three people get chosen to play a halftime game! Each person gets 5 throws through the goal posts to try and beat 250 points. Use the tally chart below to help you answer the questions.

	THROWS WORTH	THROWS WORTH	THROWS WORTH	TOTAL POINTS
--	--------------	--------------	--------------	--------------

100

1

HALFTIME SHOW

Wow what a first half! The Stingrays are leading by two! Now it's time for some halftime entertainment!

- The band started performing at the 0 yard line. They moved 35 yards forward and then 17 yards back. Where did they end?
- The dancing Stingettes, began performing at the 24 yard line and they danced 12 more yards. Where did their performance end?

After the band and Stingettes finished performing, the cheerleaders performed three cheers.

ORDER	CHEER NAME	CHEER LENGTH
1	T-E-A-M	75 seconds
2	Go, Stingrays!	163 seconds
3	Get Excited!	

- How long did the first two cheers last?
- If all three cheer routines lasted 300 seconds in total, how many seconds did the third cheer last?

- Fill in the total points
- Who won the game
- How many more points
- Part A: If the player...
Part B: How many...
- If you were chosen but less than 500

3.21 Related Facts

I can explain the relationship between addition and subtraction.

Fact Fluency

Subtraction within 20

$$20 - 15 =$$

Related Facts

Turn and Talk!

What do you notice about the relationship between addition and subtraction?

$$\begin{array}{r} 82 \\ + 68 \\ \hline \end{array} \qquad \begin{array}{r} 150 \\ - 68 \\ \hline \end{array}$$

Related Facts

Using the fact we solved earlier, write a related addition fact.

Related Facts

Using the fact we solved earlier, write a related subtraction fact.

for end of the unit review

INCLUDES PRE- AND POST-ASSESSMENTS, ANSWER KEYS AND RUBRICS FOR TRACKING STUDENT PROGRESS

Unit 3

9. Solve each problem, and then use a related addition fact for each problem.

$$\begin{array}{r} 324 \\ + 626 \\ \hline \end{array}$$

10. Solve each problem.

$$459 + (174 + 265) =$$

$$(459 + 174) + 265 =$$

11. Subtract each set of numbers.

$$\begin{array}{r} 400 \\ - 274 \\ \hline \end{array}$$

12. Write the four related facts for 878.

$$(459 + 174) + 265 = 633 + 265 = 898$$

11. Subtract each set of numbers.

$$\begin{array}{r} 400 \\ - 274 \\ \hline 126 \end{array}$$

12. Write the four related facts for 878.

$$\begin{array}{l} 878 - 514 = 364 \quad 514 + 364 = 878 \\ 878 - 364 = 514 \quad 364 + 514 = 878 \end{array}$$

Unit 3

1. Change each number to expanded form and add.

$$\begin{array}{r} 422 \\ + 208 \\ \hline \end{array}$$

$$\begin{array}{r} 564 \\ + 333 \\ \hline \end{array}$$

2. Add each set of numbers using the number line strategy.

$$32 + 407 \longleftarrow$$

Name: _____

Unit 3 Assessment

5. Use models to find the difference.
