

NOT SO WIMPY

UNIT 5:

DIVISION

3RD GRADE MATH CURRICULUM

20 DAYS OF LESSON PLANS,
POWERPOINTS, PROBLEM SETS,
EXIT TICKETS, ASSESSMENTS,
GAMES, TASK CARDS, PROJECT-
BASED LEARNING & MORE!

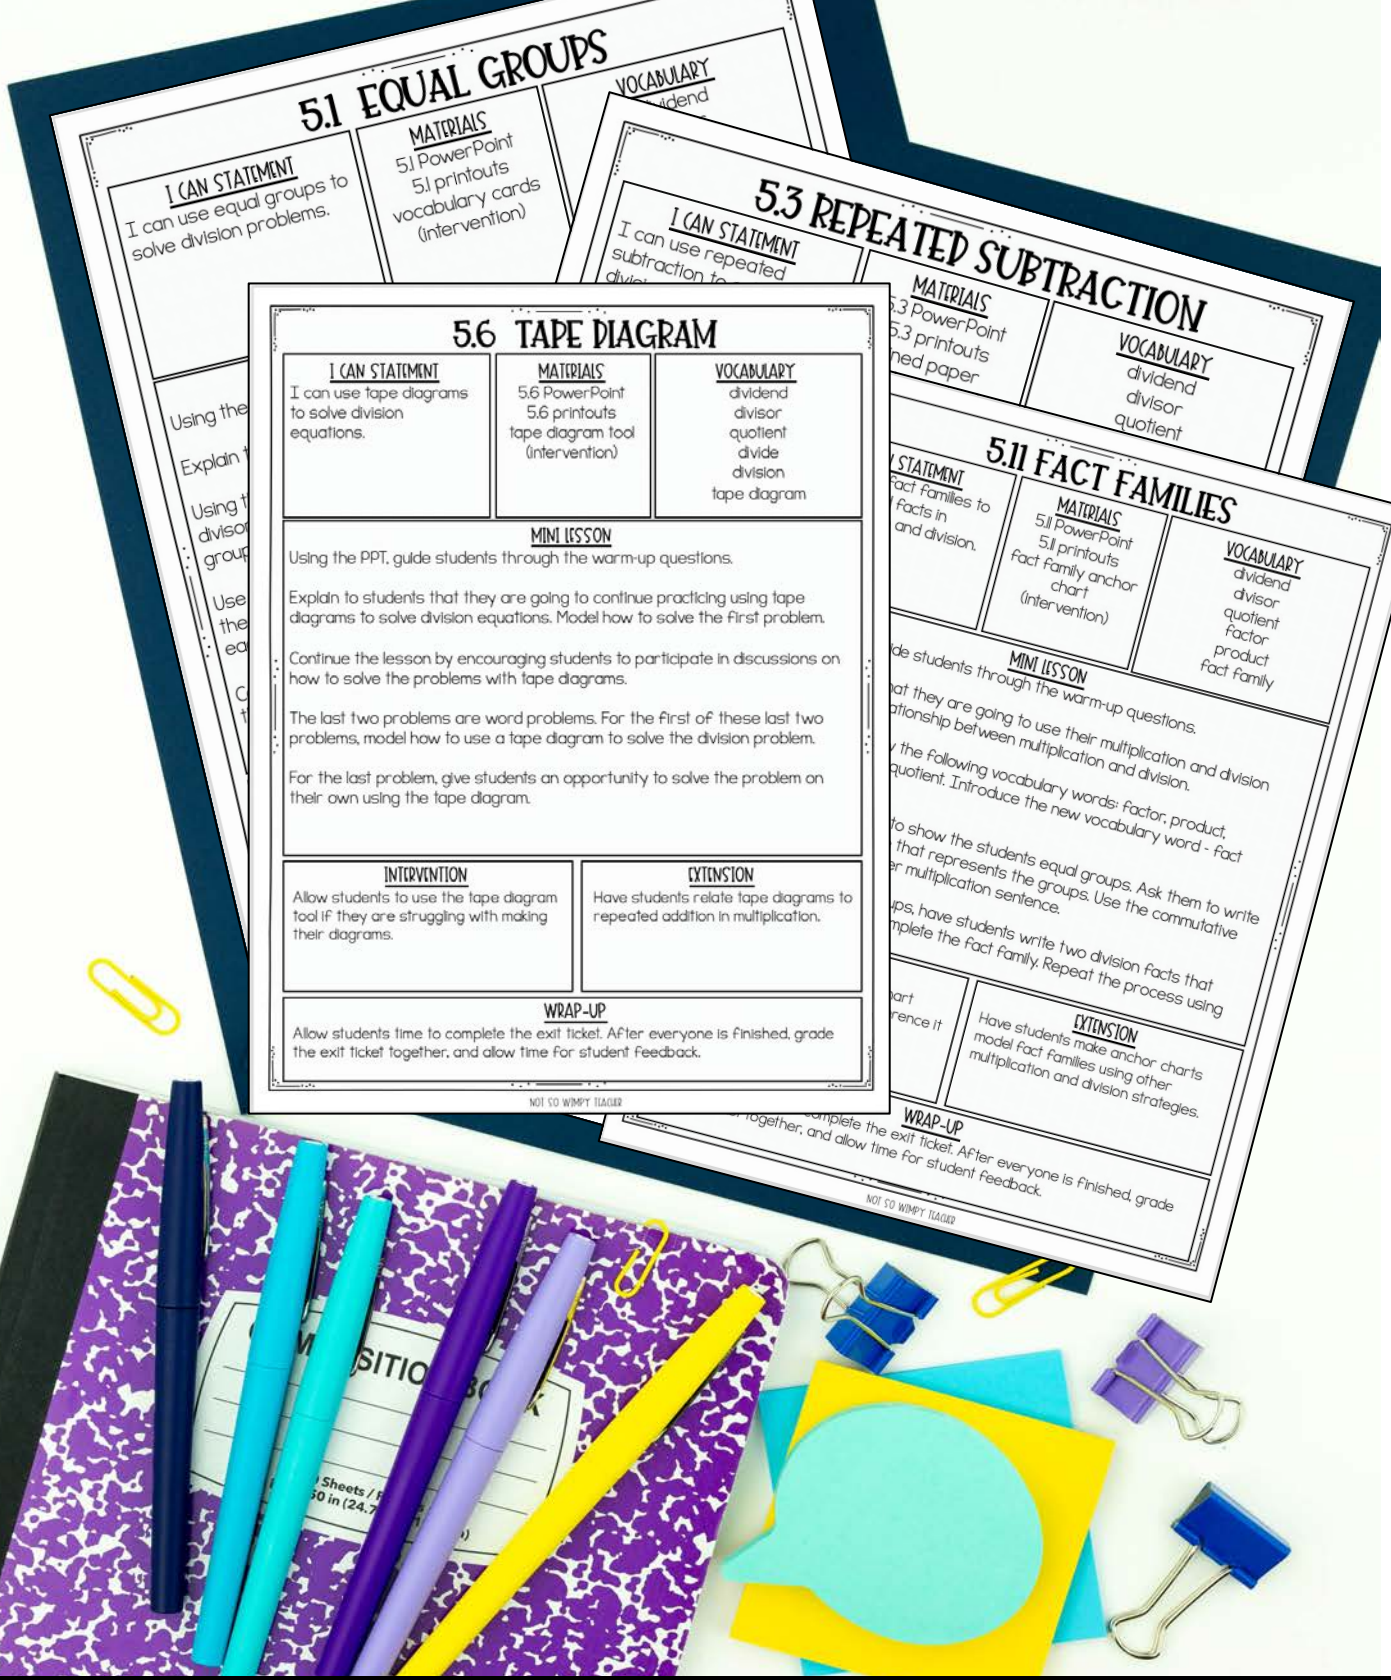

UNIT 5: DIVISION *at a glance*

Day 1 Preassessment & Equal Groups	Day 2 Equal Groups	Day 3 Repeated Subtraction	Day 4 Repeated Subtraction	Day 5 Tape Diagrams
Day 6 Tape Diagrams	Day 7 Arrays	Day 8 Arrays	Day 9 Division as Multiplication	Day 10 Review
Day 11 Fact Families	Day 12 Missing Factor	Day 13 Missing Factor	Day 14 Missing Divisor	Day 15 Missing Divisor
Day 16 Division Word Problems	Day 17 1 and 2 Step Word Problems	Day 18 1 and 2 Step Word Problems	Day 19 PBL	Day 20 Assessment

THIS UNIT COVERS THE FOLLOWING COMMON CORE MATH STANDARDS: 3.NBT.3, 3.OA.1, 3.OA.3, 3.OA.4, 3.OA.5, 3.OA.7, 3.OA.8, 3.OA.9

Notes:

Includes a pacing guide to see all
four weeks at a glance

5.1 EQUAL GROUPS

I CAN STATEMENT
I can use equal groups to solve division problems.

MATERIALS
5.1 PowerPoint
5.1 printouts
vocabulary cards (intervention)

VOCABULARY
dividend

5.3 REPEATED SUBTRACTION

I CAN STATEMENT
I can use repeated subtraction to solve division problems.

MATERIALS
5.3 PowerPoint
5.3 printouts
lined paper

VOCABULARY
dividend
divisor
quotient

5.6 TAPE DIAGRAM

I CAN STATEMENT
I can use tape diagrams to solve division equations.

MATERIALS
5.6 PowerPoint
5.6 printouts
tape diagram tool (intervention)

VOCABULARY
dividend
divisor
quotient
divide
division
tape diagram

MINI LESSON

Using the PPT, guide students through the warm-up questions.

Explain to students that they are going to continue practicing using tape diagrams to solve division equations. Model how to solve the first problem.

Continue the lesson by encouraging students to participate in discussions on how to solve the problems with tape diagrams.

The last two problems are word problems. For the first of these last two problems, model how to use a tape diagram to solve the division problem.

For the last problem, give students an opportunity to solve the problem on their own using the tape diagram.

INTERVENTION

Allow students to use the tape diagram tool if they are struggling with making their diagrams.

EXTENSION

Have students relate tape diagrams to repeated addition in multiplication.

WRAP-UP

Allow students time to complete the exit ticket. After everyone is finished, grade the exit ticket together, and allow time for student feedback.

NOT SO WIMPY TEACHER

5.11 FACT FAMILIES

I CAN STATEMENT
I can use fact families to solve multiplication and division problems.

MATERIALS
5.11 PowerPoint
5.11 printouts
fact family anchor chart (intervention)

VOCABULARY
dividend
divisor
quotient
factor
product
fact family

MINI LESSON

Use students through the warm-up questions.

Explain to students that they are going to use their multiplication and division relationship between multiplication and division.

Review the following vocabulary words: factor, product, quotient. Introduce the new vocabulary word - fact family.

Use anchor charts to show the students equal groups. Ask them to write a fact family that represents the groups. Use the commutative property to write the multiplication sentence.

For word problems, have students write two division facts that complete the fact family. Repeat the process using other multiplication facts.

EXTENSION

Have students make anchor charts for multiplication and division strategies.

WRAP-UP

Allow students time to complete the exit ticket. After everyone is finished, grade the exit ticket together, and allow time for student feedback.

NOT SO WIMPY TEACHER

INCLUDES 20 DAYS OF WHOLE GROUP LESSON PLANS!

5.6 MEET THE TEACHER

MATERIALS FOR TEACHER: whiteboard, marker, eraser

MATERIALS FOR STUDENTS: whiteboard, marker, eraser

TEACHING	Model how to solve $27 \div 3$ using a tape diagram. Model how to add one to each group until you reach the dividend.
ON TRACK	Write $40 \div 4$ on your whiteboard. Ask students to write the dividend on their tape diagrams. Have students add to each group until they reach 40. Find the quotient by asking them how many are in each group. Repeat with $32 \div 8$, $28 \div 4$, and $72 \div 8$.
MASTERCED	Ask students to solve $27 \div 3$ on their whiteboards using tape diagrams. Monitor for misconceptions or errors, and reteach as necessary.
ON TRACK	Ask students to solve $32 \div 8$ on their boards, and choose a student to model how to solve it to the rest of the group. Repeat with $28 \div 4$, $72 \div 8$, and $42 \div 6$.
MASTERCED	Ask students to solve $32 \div 8$ on their boards, and choose a student to model how to solve it to the rest of the group. Repeat with $28 \div 4$, $72 \div 8$, and $42 \div 6$.
NOTES:	Ask students to relate using tape diagrams to skip counting and repeated addition in multiplication. How are they similar?

NOT SO WIMPY TEACHER

INCLUDES SMALL GROUP/ MEET WITH TEACHER LESSON PLANS

Name: _____

Unit 5 Lesson 18 Problem Set

Directions: Solve each problem using the word problem solving strategy.

1. Marly had \$97. He went shopping and bought 4 shirts for \$8 each.

Name: _____

Unit 5 Lesson 9 Homework

Directions: Use skip counting to solve the division equation.

1. $27 \div 3 = \underline{\quad}$

Name: _____

Unit 5 Lesson 15 Problem Set

Directions: Use a tape diagram to find the missing divisor.

1. $36 \div r = 4$ $r = \underline{\quad}$

Name: _____

Unit 5 Lesson 14 Homework

Directions: Use a tape diagram to find the missing divisor.

1. $21 \div v = 3$ $v = \underline{\quad}$

2. Misty each stamp.

3. Heidi batch cupcake.

4. Newt minute him 38.

2. $100 \div a = 10$ $a = \underline{\quad}$

3. Melanie bought 7 packs of pens. She pens. How many pens were in each pack?

4. Clint has 18 horses. His barn has 9 stalls. How many horses should he put in each stall?

Name: _____

Unit 5 Lesson 18 Exit Ticket

Directions: Solve the problem using the word problem solving strategy.

Name: _____

Unit 5 Lesson 15 Exit Ticket

Directions: Use a tape diagram to find the missing divisor.

1. $50 \div p = 10$ $p = \underline{\quad}$

Name: _____

Unit 5 Lesson 7 Exit Ticket

Directions: Solve the equation using an array.

1. $28 \div 7 = \underline{\quad}$

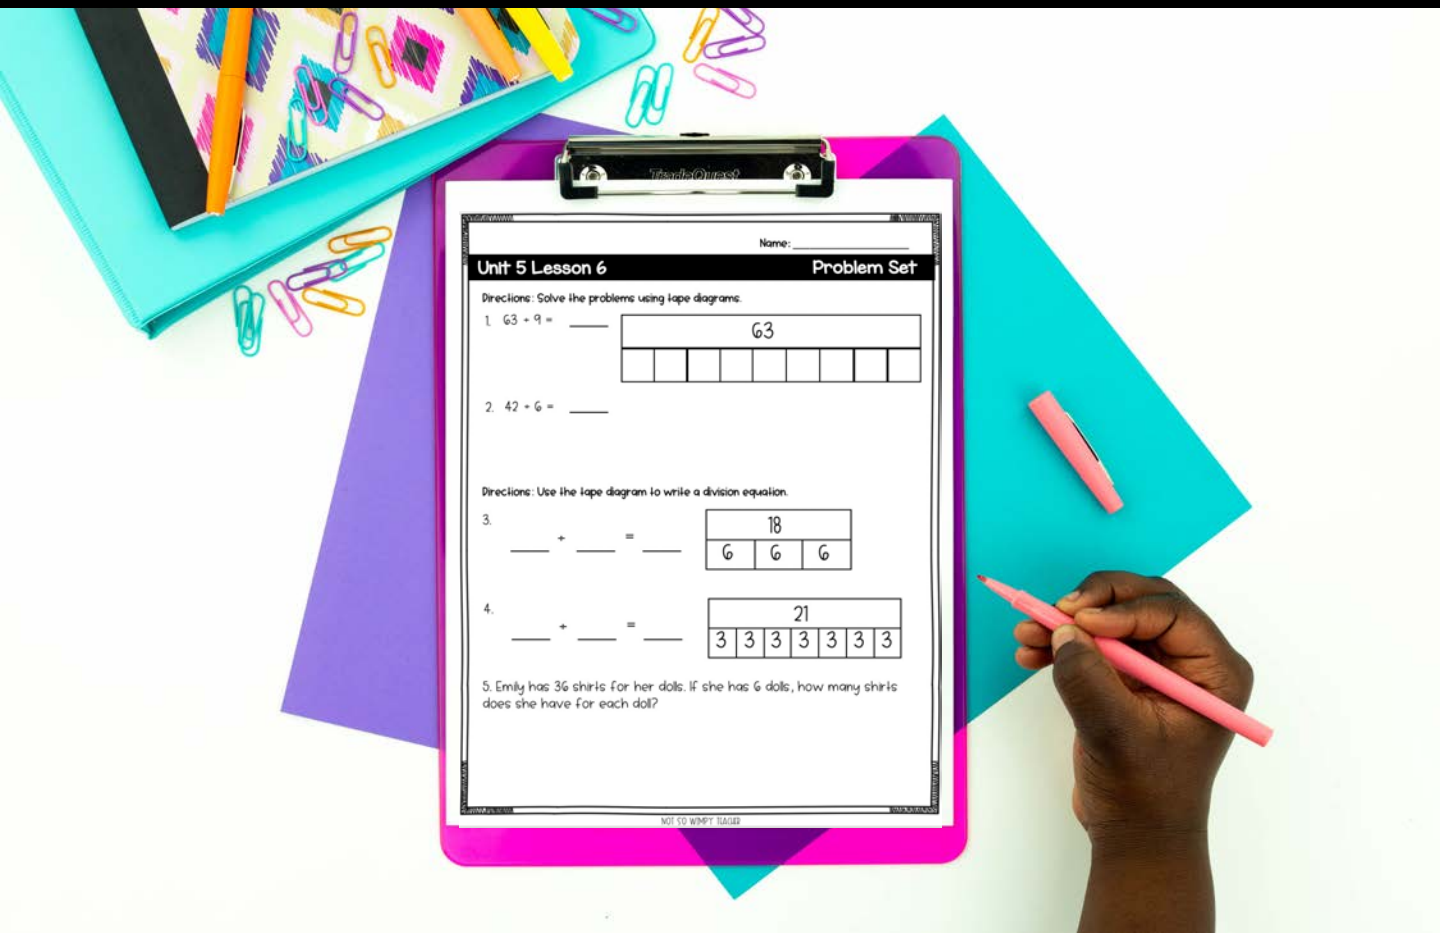

54

0

anges. If

les of the Appalachian Trail. They many miles did they walk each day?

INCLUDES PROBLEM SETS, HOMEWORK, AND EXIT TICKETS FOR EACH DAY

5.4 Repeated Subtraction

I can use repeated subtraction to solve...

Fact Fluency

+ & - within 20

Use the ten frames to add and subtract within 20.

Repeated Subtraction

Use repeated subtraction to find the quotient.

$$42 \div 6 =$$

Repeated Subtraction

Vocabulary Review:

$$15 \div 3 = 5$$

↑ ↑ ↑

Repeated Subtraction

How many times did we have to subtract 6 to reach zero?

$$36 \div 6$$

$$36 - 6 = 30$$

$$30 - 6 = 24$$

Exit Ticket

Directions: Solve the equation using repeated subtraction.

1. $32 + 8 =$ _____

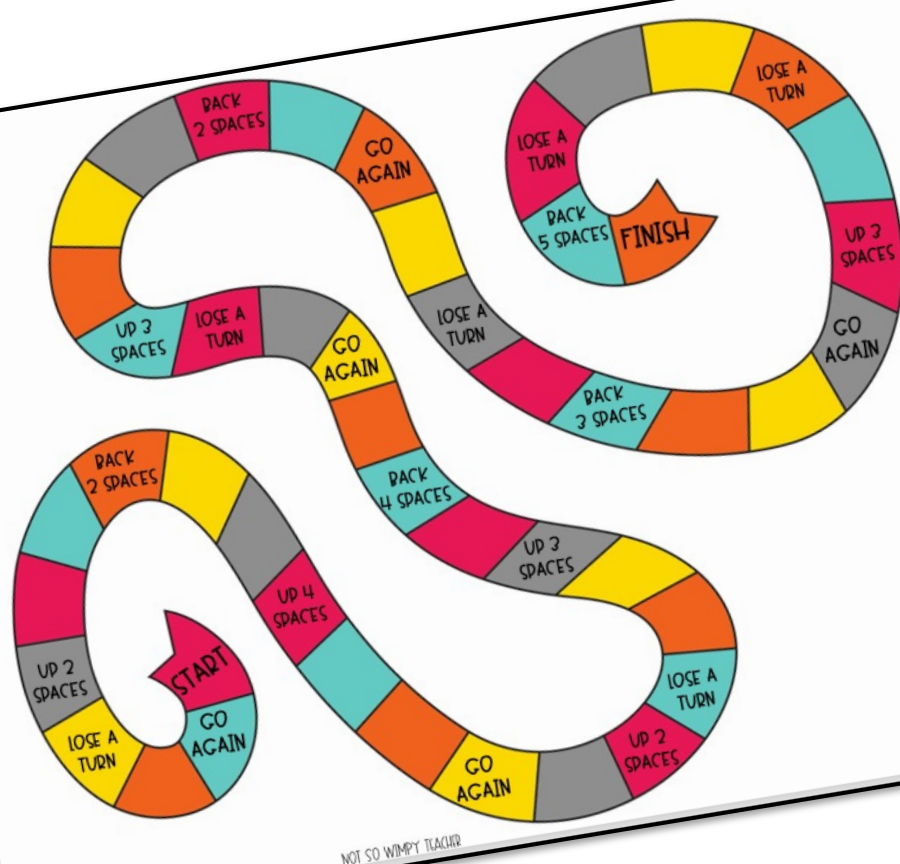

Directions: Write the division equation that represents the repeated subtraction sentences.

2. _____ + _____ = _____

$$16 - 8 = 8$$

$$8 - 8 = 0$$

INCLUDES DAILY POWERPOINTS FOR TEACHING MATH SKILLS.

CARD 1:
Write a division equation from the tape diagram.

18		
6	6	6

CARD 13:
Complete the fact family.

$3 \times 4 = 12$ $12 \div 3 = 4$
 $4 \times 3 = 12$ $_ \div _ = _$

CARD 5:
Write a division equation for the array.

NOT SO WIMPY TEACHER

a game and scoot are included for the end of unit review

Write a division equation for the array.

Complete the fact family.
 $3 \times 4 = 12$
 $4 \times 3 = 12$
 $12 \div 3 = 4$
 $_ \div _ = _$

Find the missing factor.
 $7 \times w = 63$

DIVISION Name: _____

Directions: Read each card and record your answer in the box.

MINI LESSON

Using the PPT, guide students through the warm-up questions.

Tell the students that we are going to learn a new division strategy today, using arrays. Remind students what an array is and how we used it in multiplication.

Using the PPT, model how to make an array to solve a division equation. Begin by asking how many total dots we have (the dividend). Then, ask how many

Unit 5 Lesson 1

Exit Ticket

Directions: Solve each equation using equal groups.

1. $28 \div 4 = \underline{\quad}$

2. $64 \div 8 = \underline{\quad}$

FACT FAMILIES

A set of related multiplication and division number sentences, that

$5 \times 3 = 15$
 $3 \times 5 = 15$

REPEATED SUBTRACTION

$15 \div 3$

$15 - 3 = 12$ ← 1 time
 $12 - 3 = 9$ ← 2 times
 $9 - 3 = 6$ ← 3 times
 $6 - 3 = 3$ ← 4 times

Equal Groups

DIVISION Arrays

$15 \div 3$

$32 \div 8$

Directions: Cut along the scissor lines. Glue the flaps into a journal. Under each flap, write the corresponding division equation for the array, or write the array that represents the multiplication equation.

FACT FAMILY

Numbers that make 2 multiplication and 2 division equations

$5, 3, 15$
 $5 \times 3 = 15$
 $3 \times 5 = 15$
 $15 \div 3 = 5$
 $15 \div 5 = 3$
