OPERATIONS
WITH FRACTIONS

4th GRADE
MATH CURRICULUM

25 DAYS OF COMPARING
FRACTIONS MATH LESSON PLANS,
POWERPOINTS, ACTIVITIES,
AND ASSESSMENT

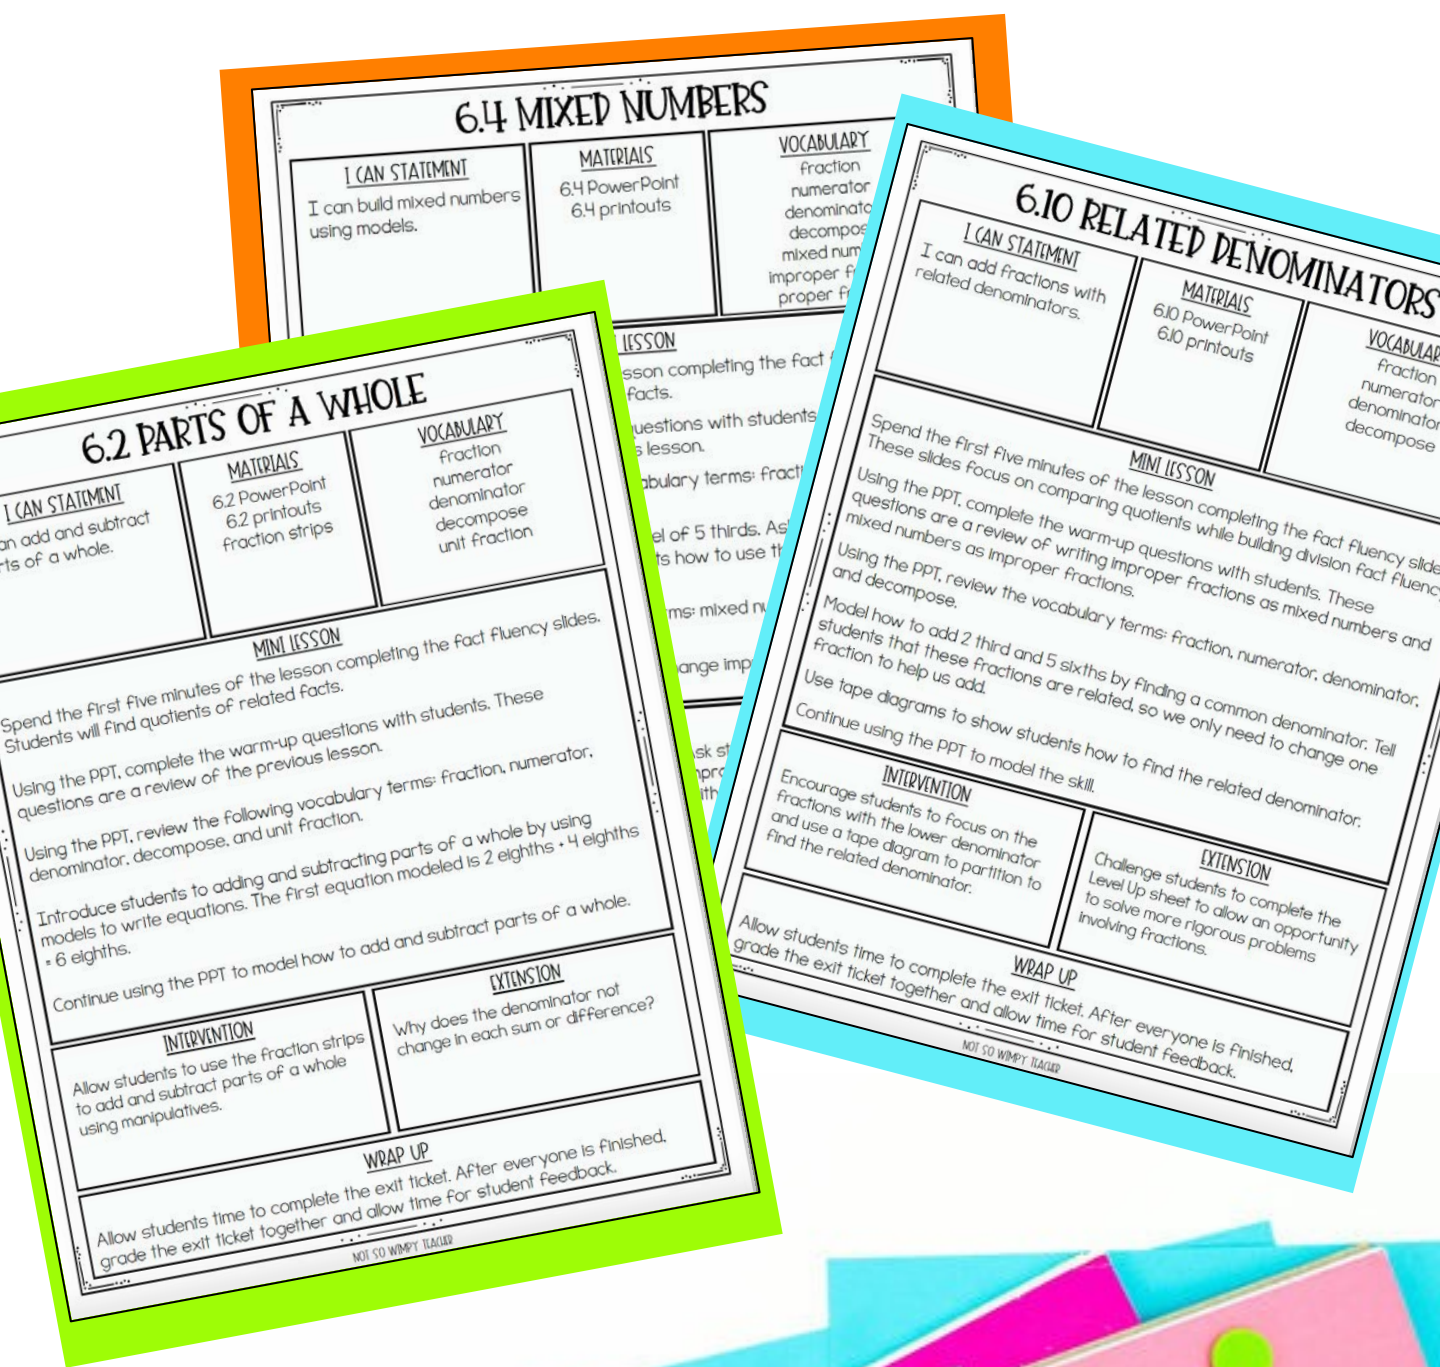

UNIT 6: OPERATIONS WITH FRACTIONS *at a glance*

Day 1 Decompose Fractions	Day 2 Adding and Subtracting Parts of a Whole	Day 3 Adding & Subtracting Fractions: Like Denominators	Day 4 Mixed Numbers / Improper Fractions	Day 5 Mixed Numbers / Improper Fractions
Day 6 Mixed Numbers / Improper Fractions	Day 7 Adding Fractions: Mixed Numbers	Day 8 Subtracting Fractions: Mixed Numbers	Day 9 Adding and Subtracting Mixed Numbers	Day 10 Adding Fractions: Related Denominators
Day 11 Subtracting Fractions: Related Denominators	Day 12 Adding/Subtracting Fractions: Related Denominators	Day 13 Review	Day 14 Adding Fractions: Associative Property	Day 15 Adding Mixed Numbers: Associative Property
Day 16 Multiplying Whole Numbers & Fractions	Day 17 Multiplying Whole Numbers & Fractions	Day 18 Multiplying Whole Numbers & Fractions	Day 19 Multiplying Whole & Mixed Numbers	Day 20 Multiplying Whole & Mixed Numbers
Day 21 Word Problems	Day 22 Word Problems	Day 23 Word Problems	Day 24 Review	Day 25 Assessment

IT COVERS THE FOLLOWING COMMON CORE MATH STANDARDS: 4.NF.3, 4.NF.3a, 4.NF.3b, 4.NF.3c, 4.NF.3d, 4.NF.4, 4.NF.4a, 4.NF.4b, and 4.NF.4c

INCLUDES A PACING GUIDE TO SEE YOUR ENTIRE WEEK AT A GLANCE

INCLUDES WHOLE GROUP
LESSON PLANS!

6.4 MEET THE TEACHER

MATERIALS FOR TEACHER: journal pages for teacher and students, scissors, glue, pencil

MATERIALS FOR STUDENTS: journals, scissors, glue, pencils

APPROACHING

Model how to quickly cut and glue the journal page. Have students show you that they can do the same in a similar manner using their journal pages.

Complete the first problem with the students. Have students walk you through how to solve the remaining two problems. Have students solve the remaining top two problems on their own and check together.

Model how to solve the improper fraction problem by having each student draw a model of the fraction together to find the mixed numbers.

Model how to quickly cut and glue the journal page. Have students show you that they can do the same in a similar manner using their journal pages.

ON TRACK

Model how to solve the first problem. Have students work in pairs to solve the remaining two problems. Pairs sit quietly until everyone has an answer as a group.

MASTERCED

Model how to quickly cut and glue the journal page. Have students show you that they can do the same in a similar manner using their journal pages.

Have students complete the remaining two problems. Have students show you that they can do the same in a similar manner using their journal pages. Have students complete the remaining two problems. Have students show you that they can do the same in a similar manner using their journal pages.

NOTES:

6.9 MEET THE TEACHER

MATERIALS FOR TEACHER: journal pages for teacher and students, scissors, glue, pencil

MATERIALS FOR STUDENTS: journals, scissors, glue, pencils

APPROACHING

Model how to quickly cut and glue the journal page. Have students show you that they can do the same in a similar manner using their journal pages.

Complete the first problem with the students. Have students walk you through how to solve the remaining two problems. Have students solve the remaining top two problems on their own and check together.

Model how to solve the first problem. Have students work in pairs to solve the remaining two problems. Pairs sit quietly until everyone has an answer as a group.

Have students complete the remaining two problems. Have students show you that they can do the same in a similar manner using their journal pages.

NOTES:

6.10 MEET THE TEACHER

MATERIALS FOR TEACHER: whiteboard, marker, eraser

MATERIALS FOR STUDENTS: whiteboards, markers, erasers

APPROACHING

Model how to add $\frac{4}{10}$ plus $\frac{3}{10}$. Use a tape diagram to decompose to make a like denominator. Partition each tape diagram to find the new denominator. Then, now the fractions have like denominators so we can add the fractions.

Work together with students to add $\frac{2}{3}$ plus $\frac{5}{6}$. Use the same steps as before, but ask students what we should do have them work on their whiteboards.

Repeat with $\frac{7}{8}$ plus $\frac{2}{4}$ and $\frac{2}{9}$ plus $\frac{1}{3}$. Use a tape diagram to determine the related denominator. Once each fraction has a like denominator, ask students to add to find the sum of the fraction with another partner pair.

ON TRACK

After you have solved the problem together, ask students to add $\frac{2}{3}$ plus $\frac{5}{6}$ with a partner. Have them check their answers with another partner pair.

Repeat with $\frac{7}{8}$ plus $\frac{2}{4}$ and $\frac{2}{9}$ plus $\frac{1}{3}$. Have students add $\frac{2}{12}$ plus $\frac{3}{4}$ and $\frac{2}{9}$ plus $\frac{1}{3}$ on their whiteboards by drawing tape diagrams. When all students are finished, have them check their work with a partner.

MASTERCED

Ask students if they can solve the problem without a tape diagram. Choose a student to explain to the group how to solve without tape diagrams.

Challenge students to solve $\frac{7}{8}$ plus $\frac{2}{4}$ and $\frac{2}{9}$ plus $\frac{1}{3}$ without using a tape diagram.

NOTES:

INCLUDES SMALL GROUP/ MEET WITH TEACHER LESSON PLANS

Name: _____

Unit 6 Lesson 1 Problem Set

Directions: Use a number bond to decompose the fraction into the product of a whole number by a unit fraction.

Name: _____

Unit 6 Lesson 1 Problem Set

Directions: Use a number bond to decompose the fraction into the product of a whole number by a unit fraction.

Name: _____

Unit 6 Lesson 8 Problem Set

Directions: Solve each problem. Write the difference on the line. Draw models if needed.

1. $6\frac{2}{3} - 2\frac{1}{3} =$ _____

2. $9\frac{7}{10} - 4\frac{3}{10} =$ _____

3. $12\frac{8}{9} - 7\frac{4}{9} =$ _____

4. $15\frac{6}{7} - 12\frac{2}{7} =$ _____

5. $4\frac{2}{4} - 2\frac{3}{4} =$ _____

6. Nessie poured 8 and 2 thirds cups of the end of the day, there were 3 and

Exit Ticket

Directions: Use a tape diagram to subtract the fractions with related denominators.

INCLUDES DAILY POWERPOINTS FOR TEACHING MATH SKILLS.

REVIEW board game

How to Play:

- The first player picks up the first question card and answers it. Other players check the answer using the answer cards.
- If the player is correct, they roll the die, move forward that many spaces, and follow any directions on the space where they land.
- The next player draws a question card and repeats the same steps.
- The first player to go all the way around the board and reach the "start/finish" space is the winner!

CARD 10:
Find the sum.
 $0\frac{6}{12} + 1\frac{2}{12}$

CARD 19:
Find the difference.
 $13\frac{9}{10} - 8\frac{3}{10}$

CARD 22:
Find the sum.
 $6 + \frac{2}{10}$

games and task cards are INCLUDED FOR END OF UNIT REVIEW

OPERATIONS WITH FRACTIONS

with TASK CARDS MID UNIT REVIEW

Directions: Read each card and record your answer in the box.

1.	2.	3.	4.
5.	6.	7.	8.
9.	10.	11.	12.

Use a tape diagram to decompose the fraction into the product of a whole number by a unit fraction.
 $\frac{3}{8}$

Find the sum.
 $12\frac{3}{8} + 5\frac{2}{8}$

Tarik needs $3\frac{5}{8}$ cups of semi-sweet chocolate chips and $1\frac{2}{8}$ cups of dark chocolate chips for his cookie recipe. How many cups of chocolate chips does he need?

Use the models to find the difference of the equation.

Unit 6

Directions: Draw a model for each given fraction.

1. $\frac{4}{5}$ 2. $\frac{6}{9}$

Directions: Use the models to decompose each fraction into the product of a unit fraction and a whole number.

4. $\frac{3}{7}$

Unit 6

Directions: Use a model to decompose the fraction into the product of a unit fraction.

1. $\frac{4}{6}$ 2. $\frac{3}{8}$

Unit 6 Assessment

Directions: Solve each problem. Write the answer on the line.

16. $\frac{7}{8} + \frac{2}{4} = \underline{\hspace{2cm}}$ 17. $\frac{3}{5} + \frac{2}{5} = \underline{\hspace{2cm}}$

18. $\frac{3}{11} - \frac{1}{9} = \underline{\hspace{2cm}}$ 19. $\frac{8}{9} - \frac{2}{3} = \underline{\hspace{2cm}}$

Write the sum on the line.

Unit 6 Pre

Directions: Draw a model for each given fraction.

1. $\frac{4}{5}$ 2. $\frac{6}{9}$

Directions: Use the models to decompose each fraction into the product of a unit fraction and a whole number.

4. $\frac{3}{7}$

$\frac{1}{7} + \frac{1}{7} + \frac{1}{7} = \frac{3}{7}$

Assessment Answer Key

10. $4\frac{5}{7} = \frac{33}{7}$

11. $1\frac{4}{3} = 12\frac{1}{3}$

Directions: Compare each fraction using >, <, or =.

6. $\frac{5}{9} > \frac{3}{9}$

7. $\frac{2}{12}$

8. $\frac{7}{5} < \frac{7}{3}$

9. $\frac{5}{6}$

Directions: Use area models to generate equivalent fractions.

5. $\frac{4}{2} = \frac{8}{4}$

6. $\frac{9}{5} = \frac{18}{10}$

13. $8\frac{3}{4} - 3\frac{2}{4} = 5\frac{1}{4}$

14. $10\frac{6}{8} - 9\frac{4}{8} = 1\frac{2}{8}$

15. $11\frac{5}{9} - 6\frac{7}{9} = 7\frac{7}{9}$

6.10 RELATED DENOMINATORS

I CAN STATEMENT

I can add fractions with related denominators.

MATERIALS

6.10 PowerPoint
6.10 printouts

VOCABULARY

Fraction
numerator
denominator
decompose

MINI LESSON

Spend the first five minutes of the lesson completing the fact fluency slides. These slides focus on comparing quotients while building division fact fluency.

Using the PPT, complete the warm-up questions with students. These questions are a review of writing improper fractions as mixed numbers and mixed numbers as improper fractions.

Using the PPT, review the vocabulary terms: fraction, numerator, denominator, and decompose.

Model how to add $2\frac{1}{3}$ and $5\frac{1}{6}$ by finding a common denominator. Tell students that these fractions are related, so we only need to change one fraction to help us add.

Use tape diagrams to show students how to find the related denominator.

Continue using the PPT to model the skill.

INTERVENTION

Encourage students to focus on the fractions with the lower denominator and use a tape diagram to partition to find the related denominator.

EXTENSION

Challenge students to complete the Level Up sheet to allow an opportunity to solve more rigorous problems involving fractions.

WRAP UP

Complete the exit ticket. After everyone is finished.

Name: _____

Homework

Decompose the fraction into the product of a whole

$$2. \quad \frac{4}{5}$$

$$\frac{\quad}{\quad} \times \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

Decompose the fraction into the product of a whole

$$4. \quad \frac{8}{10}$$

Decompose the fraction into the product of a whole number by

$$6. \quad \frac{3}{6}$$

Related Denominators

What is the difference?

Related Denominators

Decompose one tape diagram to make the same units.

$$\frac{4}{5} - \frac{1}{10} =$$

DENOMINATOR

1

ASSOCIATIVE PROPERTY

grouping the addends without changing the sum

$$\left(\frac{2}{7} + \frac{1}{7}\right) + \frac{5}{7} =$$

$$\frac{2}{7} + \left(\frac{1}{7} + \frac{5}{7}\right)$$

MIXED NUMBER

improper and proper

$$7\frac{3}{11}$$

FRACTION STRIPS

Directions: Cut along the scissor lines. Glue the flaps into a journal. Under each flap, write the sum or difference of each expression.

FRACTIONS

Adding and Subtracting Mixed Numbers

$$3\frac{2}{5} + 4\frac{1}{5}$$
